

## Rhododendron 'Nova Zembla'

|                       |                                               |
|-----------------------|-----------------------------------------------|
| Height                | 2,5 - 4 m                                     |
| Width                 | 2,5-4m                                        |
| Crown                 | round/spherical, dark, dense crown            |
| Leaf                  | green, evergreen                              |
| Flowers               | flowers in May                                |
| Spines/thorns         | None                                          |
| Toxicity              | has toxic components                          |
| Soil type             | loamy soil, sandy soil, peaty soil, acid soil |
| Paving                | tolerates partial paving                      |
| Winter hardiness zone | 5b (-26,0 to -23,4 °C)                        |
| Other resistances     | resistant to frost (WH 1 - 6)                 |
| Application           | tree containers, roof gardens, patio gardens  |
| Shape                 | large blooming hybrids                        |

This rhododendron has a quite loose, but wide and upright habit. The flowers are deep red with an almost black macula. This is one of the best red-flowering cultivars, very hardy.
